Name - Harshit Saini
Section - K
Roll no - 1918367

Q2:

→ Open git bash

→ Type, git config --global user.name "Harshit"

→ git config --global user.email "harshitsaini1815@gmail"

→ git config --list

→ pwd

→ mkdir Harshit Demo   (make a directory)

→ cd Harshit Demo   (change a directory)

→ pwd

→ git init

→ pwd

→ touch sample1.txt

→ notepad sample.txt

→ git add .

→ git status

→ git commit -m "First commit"

Name- Harshit Saini
Section - K

→ git remote add origin - (copy github link)

→ git branch -M main

→ git push -u origin main

→ pwd

→ touch   sample 1. txt
→ notepad   sample 1. txt

→ git status

→ git add .

→ git status
→ git commit -m " Sample Commit"

→ git remote add origin (link)

→ git branch -M main

→ git push -u origin main

⇒ Your git repo will be added to
   git hub.

Q3

→ Open the Github
→ login with your I'd
→ open Once you login with I'd
   then press the the forks button in
   the upper left. So this will create an
   exact copy of the repository under
   your own username

→ When the repository is created then
   you need to clone to your local
   development environment.

→ A new branch for each change you
   want to make
   Replace fix-readme-type with a
   more descriptive name for your
   change which you like.

→ Add the files you've changed and
   commit then with a descriptive
   message

→ Create a Pull request.

Welcome to pull requests!

Pull requests help you collaborate on code with other people. As pull requests are created, they'll appear here in a searchable and filterable list. To get started, you should create a pull request.

https://github.com/Harshitsaini12/Demo-1/compare

Create a new pull request by comparing changes across two branches. If you need to, you can also compare across forks.

base repository: **Lisaverma1520/Demo** ▾ base: **main** ▾ ← head repository: **Harshitsaini12/Demo-1** ▾ compare: **main** ▾

✓ **Able to merge.** These branches can be automatically merged.
